

# MEET THE ATD FACE SHIELD.

*Comfortable, affordable  
and immediately  
available.*

In forty years of business, we've made all types of safety critical components for automobiles and industry. In response to a public safety need during this pandemic, Cuyahoga Community College (Tri-C) reached out to ATD as a trusted industry partner to provide an innovative, economic option to address the PPE shortage. The Can-Do People at ATD did just that and will keep making and offering them for a fair price as long as they are needed.

Lightweight, durable and built for maximum comfort and protection, the ATD Face Shield is perfect for many work environments. Our product is designed to be worn with other forms of PPE (safety glasses, hard hats, hearing protection, etc). And while protecting yourself and others, you'll hardly know it's there. The ATD Face Shield is reusable and can be worn for extended periods of time. Easy to clean and easy to wear.

Our products, including the ATD Face Shield, are American made and built in Ohio.
