TRAUMA-INFORMED CARE

Becoming “trauma-informed” means recognizing that people often have many different types of trauma in their lives. People who have been traumatized need support and understanding from those around them. Often, trauma survivors can be re-traumatized by well-meaning caregivers and community service providers. The Iowa TIC project seeks to educate our communities about the impact of trauma on clients, co-workers, friends, family, and even ourselves. Understanding the impact of trauma is an important first step in becoming a compassionate and supportive community.

Ohio State University Extension Medina County brings you:

Trauma Informed Care Training
